

Free trial with Rigibore’s micron accurate on diameter automated boring system, Zenith.

- Experts In Automation

We work closely with companies on a global scale to implement the perfect boring process, **reducing cycle time, improving part quality & optimising tool efficiency.**

From initial survey and analysis of your current manufacturing to installation and prove out of our automated system, Rigibore use decades of knowledge to revolutionise your boring operation.

- Rigibore’s Zenith Solution - What Is It?

Our **Industry 4.0** ready solution integrates ActiveEdge tools with in-process measurement to enable a machine control to automatically compensate the cutting edge.

Pay As You Save - Recouping Your Investment

Rigibore accepts that upfront investment for our total automation solution may seem like a risk, so we are offering customers the opportunity to pay back costs as the solution creates speedy and continuous savings.

Payment for this solution can be made after a successful **one month trial period within normal trading terms** or in **monthly instalments over a 6 month period** after installation and initial prove out. This allows customers to pay for the tool(s) while Zenith generates a Return On Investment (ROI), this includes:-

- 
Certified Part Quality - Eliminated risk of scrap/re-work
- 
Reduced Cycle Time - Accelerated productivity
- 
Maximised Spindle Utilisation - Adjustment in the machine carousel
- 
Lights Out Manufacturing - 24 hour production capabilities
- 
Removed Operator Intervention - Automated solution
